

Updating your Surface Go/Dell Laptop

The following instructions will guide you through checking for and installing updates to your **Surface Go** or **Dell Laptop**.

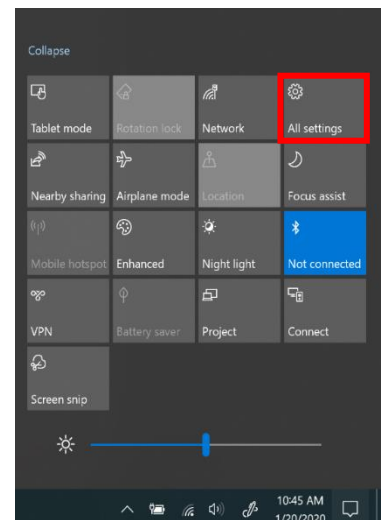

It is recommended to check for updates at least once per week, and to have your device connected to a power source. Symptoms that would indicate the need to update your device include problems with your audio, difficulty connecting to a wireless display and/or maintaining a wireless connection, and changes in the display.

INSTRUCTIONS

1. To begin, you can enter **Check for Windows updates** in the Cortana search field on the task bar; or

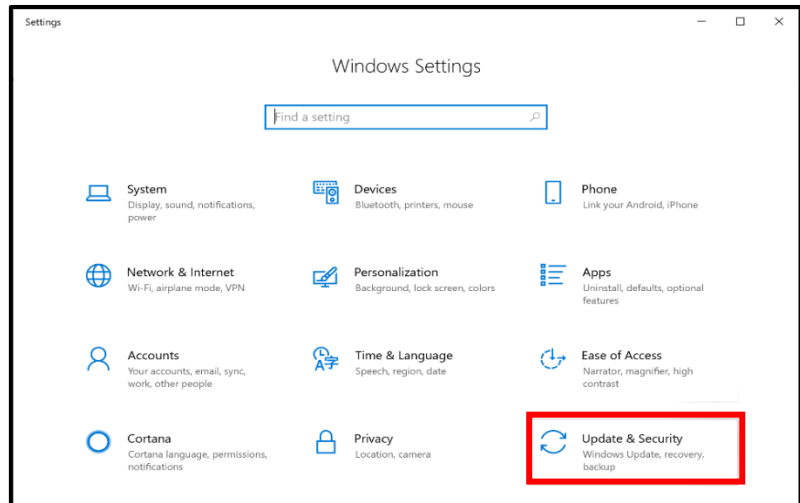

2. Swipe in from the left of your screen, go to **All Settings**.

Updating your Surface Go/Dell Laptop

3. Select **Update & Security**.

4. Choose **Windows Update > Install Now**

5. **Restart** your device to complete the update process.
